## **About us**

STOCK-CHI's target is to be top option for independent electronics manufacturer, serving high quality products, fast and on time delivery to ensure customer receiving good service, in order to achieve this goal, STOCK-CHIP on the one hand believes in high standard ethics, promotes administration and responsibility system, on the other hand establishes new type of supply relationships for better using resources, and enhance capacity of effectively providing the largest components by newwork, our aim is to become a high effectively and respected mutual incentive partner.

## **Quality**

We are committed to offer high-level quality components to reach customer satisfaction and company growth.

## **Service**

The quality STOCK-CHIP's offering is what we guarantee

## **History**

After many years in this field, we have notices that many independent distributors value "bottom line" more than quality and satisfaction. Therefore in year 2000, STOCK-CHIP shareholder realizes that we need to immediately reform our business mode to Customer-oriented, with this view, we pay more attention to customer needs, raising it to the top place, after many years struggling in small-scale distribution, expanding product series, and start stockpiling purchasing electronic compounds.

Nowadays , we keep providing customer around the world with more than 600 manufacturer's electronic components. in order to service different time zone customers, company has decided to offer day-and-night working hours service from 14:00 pm to 05:00 (shift)
